

Application

NL Agency
Ministry of Foreign Affairs

	4.8 In which city, province/region will the project take place?	LAKE NAIVASHA BASIN, NAKURU COUNTY
<i>A partnership form should be provided for all partners.</i>	4.9 How many other partners are included in the partnership - excluding the applicant?	12
<i>Provide a one-sentence project goal.</i>	4.10 What is the goal of the project?	By 2020 Integrated water resource management and sustainable development functioning across the LN Basin through a PPP approach and long-term finance mechanism
<i>Give a brief description of the project. Pay attention to the reason to start the project</i>	4.11 Project summary	<p>The Lake Naivasha basin – world famous for cut flower production – presents a broad range of stakeholder interests all largely dependent on natural resources – particularly water. These stakeholders rely on surface or groundwater to operate their businesses and to fulfil their lifestyles.</p> <p>The development of dynamic network of partners started 20 years ago! Most partners in this PPP (Public-private-partnership) have been working together in Lake Naivasha to improve water resources management in time frame ranging from 2 to 20 years.</p> <p>Water resources management (WRM) in the Lake Naivasha basin is characterised by lack of sustainable investment and poor management. The challenge is to create a model to ensure the long term financial sustainability of enhanced management functions in WRM.</p> <p>To solve the principle lack of investments in WRM – the partners in this PPP propose to develop a model – a Lake Naivasha Basin Public-Private-Partnership Sustainable Development Fund. This fund will be managed by an autonomous institution to enhance sustainability in resources management fulfilling economic, social and environmental needs. Adequate mechanisms will be created to ensure stakeholder involvement in the Fund.</p> <p>The Key results that will be achieved in this project are</p> <ul style="list-style-type: none"> • Institutional capacity strengthening for public-private water governance and sustainable IWRM • Improved information base, management practices and monitoring functioning for sustainable integrated water resource management across the Basin; • Sustainable smallholder land and water-use practices in upstream catchment linked to payment for water and ecosystem services, improved livelihoods and climate change resilience • National and International benchmark established for sustainable production and trade of flowers • Development Fund established and managed to stimulate the sustainable social and economic development in the basin <p>This model places Lake Naivasha basin at the forefront of private sector water stewardship and the role this can have to support sustainable financing of water resources management.</p>

5 Checklist of appendices

5.1 Tick the boxes to indicate which appendices you add

- ☐ Partner forms (mandatory format)
- ☐ Project Plan (mandatory format)
- ☐ Resumes of key project members (mandatory)
- ☐ Project Budget Calculation Sheets (mandatory format)
- ☐ Financial statements of the partners (mandatory)
- ☐ Cashflows (mandatory format)
- ☐ Theory of change model (mandatory)
- ☐ Project Result Chain
- ☐ ICSR risk analysis (mandatory if applicable)
- ☐ Organizational chart (optional)
- ☐ ICSR policy companies (optional)
- ☐ FIETS
