

Installation Procedures for Windows 7

1. Copy `http%3a%2f%2fftp.inf.tu-dresden.de%2fsoftware%2fwindows%2fcygwin32%2f` from USB stick to Desktop.
2. Double click **setup-x86_64** on USB stick.

Leave most screens as default except

- Choose a Download Source: select 'Install from Local Directory'.
- Select Local Package Directory: select the Desktop

Click through the rest of the screens.

3. Delete `http%3a%2f%2fftp.inf.tu-dresden.de%2fsoftware%2fwindows%2fcygwin32%2f`.
4. Double click **cygwin64 Terminal** on Desktop (might take a few seconds to appear) and paste in the following 3 commands:

```
cp /cygdrive/f/.bashrc .  
cp /cygdrive/f/snaphu /usr/local/bin  
exit
```

5. Copy STAMPS to c: (root directory).
6. Check install worked by double clicking **cygwin64 Terminal** and entering "snaphu" at prompt. This should display the snaphu options. Next enter "matlab -nojvm" at the prompt which will open matlab. Enter "stamps(9,9)" at the matlab prompt, which should display the StaMPS version.
